Annex-I: SCHEDULE-A

1.1 Project Location

To address the pressing challenges of traffic congestion, unplanned urban growth, and associated pressures on infrastructure in Shillong city, the Government of Meghalaya has embarked on the development of New Shillong as a long-term and sustainable urban expansion initiative. The objective is to decongest the existing city while ensuring planned growth that enhances the overall well-being and quality of life of residents.

The development of New Shillong is being undertaken in two distinct phases, as outlined below:

- Phase I: New Shillong Township (NST)
- Phase II: New Shillong Knowledge City

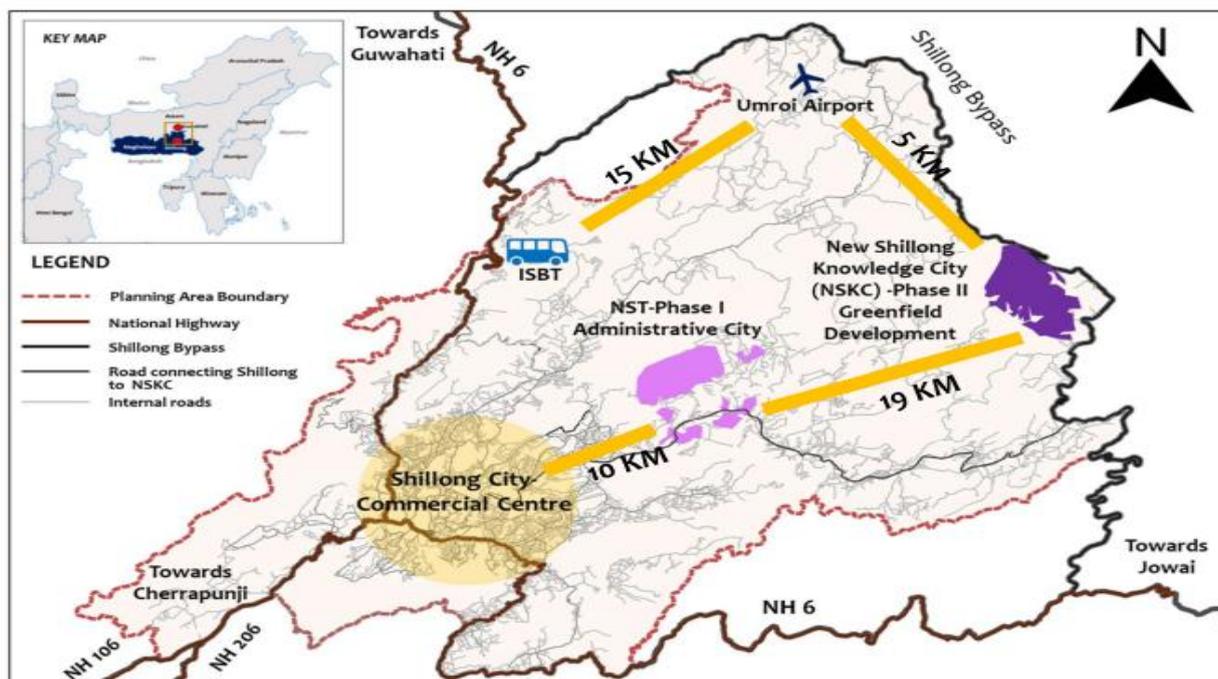

Phase I of New Shillong Township is currently at an advanced stage of development. Under this phase, the State Government has acquired approximately 914 acres of land at Mawdiangdiang, in multiple stages between 1995 and 2007, located about 8 kilometres from the main city of Shillong. Several key national and state-level institutions are already functional within Phase I of NST, including NEIGHRIMS, NIFT, and IIM Shillong, among others. These institutions have played a significant role in establishing NST as an important institutional and educational hub.

At present, the State Government is actively developing an Administrative City within NST. The primary objective of this initiative is to house the Main Secretariat, along with various State Government Departments and Directorates, in a single, well-planned precinct. This consolidation is intended to enhance inter-departmental coordination, improve administrative efficiency, facilitate timely decision-making, and streamline governance processes.

Under Phase II, the State proposes to develop New Shillong Knowledge City as a completely greenfield urban development, located in close proximity to the existing New Shillong Township. This phase aims to capitalize on the growth momentum generated by Phase I and further expand the city's role as a centre for knowledge-based institutions, innovation, education, and allied economic activities.

The development of New Shillong Knowledge City is envisioned as a planned, sustainable urban area that will complement NST and support the long-term socio-economic development of the State.

New Shillong Knowledge City (NSKC) – Proposed Greenfield Development

As part of Phase II of the New Shillong Township (NST) development to develop the New Shillong Knowledge City (NSKC) as a greenfield urban centre with a strong focus on knowledge-driven and sustainable economic growth, the State Government has acquired an additional approximately 807 acres of land at Mawpdang–Mawkhanu. The proposed city enjoys excellent regional connectivity, including proximity to Shillong Airport (Umroi), which is located at a travel time of about 20 minutes by road. The airport is situated adjacent to the Shillong–Jowai Bypass, providing seamless connectivity to different parts of Meghalaya and the wider North-Eastern region.

The overarching vision of NSKC is to develop high-quality infrastructure that strengthens the State’s key economic growth drivers, with a multi-sectoral focus on Information Technology, Tourism, Agriculture, and Knowledge Services in sports and culture.

Economic Growth Drivers of New Shillong Knowledge City

1. Information Technology (IT)

Information Technology has been identified by the State as a priority sector for economic development and employment generation. In NSKC, approximately 15 acres of land have been earmarked for the development of an IT Park, envisaged to provide plug-and-play infrastructure for entrepreneurs, start-ups, and technology firms.

The proposed IT ecosystem is expected to:

- Encourage innovation and entrepreneurship
- Attract private investment in technology services
- Generate approximately 30,000 direct and indirect employment opportunities
- Contribute significantly to the State’s digital and knowledge economy

2. Tourism

Tourism remains a major economic accelerator for Meghalaya, having recorded a pre-pandemic CAGR of 7.34%, with projected growth of approximately 19% CAGR in the coming years.

Under NSKC, the State proposes to develop a high-value tourism destination comprising:

- An 18-hole Golf Course with an integrated tourism resort
- Two high-end hotels and mid-scale hotel developments
- An Experience Centre and Amusement Park

This integrated tourism development aims to address the current gap in premium hospitality and experiential tourism offerings in the State. The tourism projects under NSKC are expected to generate around 30,000 direct and indirect jobs, while significantly enhancing the State’s tourism profile.

3. Knowledge Services (Education, Sports & Culture)

To position NSKC as a knowledge and institutional hub, about 82.6 acres of land have been earmarked for the development of educational and knowledge-based institutions. Proposed facilities include:

- National Judicial Academy
- Indian Institute for Tourism Management
- Music Academy
- Sports Academy
- Disability Sports Complex

These institutions are designed to cater to diverse segments of society, including students, athletes, artists, tourists, professionals, and persons with disabilities. The development of these facilities will help establish NSKC as a centre for excellence in education, sports, and culture, while generating approximately 1,500 direct and indirect employment opportunities.

4. Agri-Logistics

NSKC is strategically located at the confluence of the Ri-Bhoi, Khasi, and Jaintia Hills regions, which are known for the production of several high-value agricultural and horticultural crops.

To leverage this advantage, the State proposes to develop an Agri-Logistics Hub as a critical component of the city’s development plan. The hub will:

- Enable efficient transportation, storage, and processing of agricultural produce
- Reduce post-harvest losses and wastage

25. Acoustics Criteria is based on	
1	Reverberation Times
2	Sound Insulation
3	Background Noise / Vibrations / Noise Intrusion Criteria
1	The primary parameter used to quantify the room acoustic is the mid-frequency reverberation time (RT), taken as the mean of the octave band RTs in the range of 250 Hz to 4kHz. The specified reverberation times for acoustically critical spaces are provided in table below. These values apply to rooms in their finished condition but prior to the installation of furniture and technical equipment.

Space description as per MAI	Maximum mid-frequency RT, seconds
TV Studio	0.70
Film Studios	1.00
TV Sound Control Room	0.20
TV Production Control Room / TV Lighting Control Room	0.30

2 Sound insulation requirements for technical spaces are provided in table below:

From	To	Minimum internal airborne sound insulation, (MAI) $D_{n,w}$, dB
TV Studio	Any adjacent room, except associated Production and Vision Control Rooms	70
TV Studio	Production Control Room, Vision Control Room	50
TV Sound Control Room	Any adjacent room other than TV Studio	60
TV Studio	TV Studio	75
Film Studio	Any adjacent room	60
Film Studio	Film Studio	75

Vibration in Reverberation Time with Frequency

Additional requirement applicable for TV Studios, TV Sound Control rooms, TV and Film Studios as devised are mentioned in the table below, Variation in the range of 500 Hz to 2 kHz

RTs in adjacent octave bands should be within +/- 10% of each other

RTs for each octave band should be within +/- 10% of the mean value of the range of 500 Hz to 2 kHz

Any increase in the 1/3 octave band RT relative to the octave band RT at 250 Hz should be limited as far as practicable, not to exceed the values given in the table below:

1/3 Octave Band Centre Frequency (Hz)	Maximum % increase in 1/3 octave band RT above average RT in range of octaves centered on 250Hz-4kHz (see Munro Table 2)
63	100
80	50
100	30
125	20
160	13
200	9
